LEVERAGE POTENTIAL

I TRAIN CONSULTANTS

Enabling GREAT WORK CULTURE since 2007

WHO ARE WE

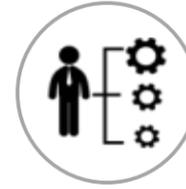

We have partnered with over 190 organizations to build organizational cultures that strike a balance between productivity and harmony. We believe learning is a journey and for the past 7 years, we have stayed true to our mission of making those journeys an enjoyable and enriching one. In doing so, we have delivered not just in making organizations productive and efficient but also happy and aligned.

Training is a just a small part of what we do; we are the enablers of your organizational culture

WHAT DO WE DO

Human Resources Consultancy

We offer HR solutions that help you hire the right fit. As you go about aligning HR processes, our consultants will design systems that will not only help you save cost and time but transform your employees' potential to your organization's most competitive advantage

Assessments

Besides certified psychometric evaluations such as MBTI and FIRO B; we have expertise in designing assessments centers that is aligned your business needs. From a quick dip stick analysis to a comprehensive evaluation, our assessments will help you make decisions that will increase your profitability

Content Development

Consistently, we have received positive feedback on our 'world class' content. Our conviction that 'training is only as good as the content' has been validated by organizations such as Wipro, NIIT, Grameen Foundations among others for whom we have developed high quality training content, functional and behavioral,

Corporate training

We conduct classroom based training workshops across all levels on over 50 different topics. Our constant endeavor is to align and customize each workshop to your organizational objectives so that it is not only a unique and enriching experience for the participants but also an investment for your organization that will yield the desired ROI in the long run.

Teambuilding Events

Our adventure challenges are centered around your organizational objective that range from in-room activities based on mental ability to the outdoors based on physical skill and execution ability.

SIGNATURE PROGRAMS

The art of story telling for leaders

The journey of a leader is incomplete without the ability to inspire ; the one quality a person looks for when they want to identify the leaders in their lives. 'Storytelling' aims to give leaders a perspective on how inspiration can be delivered through stories that belong to them and creating an audience catharsis and call to action.

Young Leadership

The first step is often the toughest step. For good performers who are promoted to people manager roles, this often proves to be true. Organizations on the other hand run the risk of losing a great performer just to find a 'not so good' manager.

Our 'Young Leadership' workshop helps reduce this risk by preparing new and first time managers for the challenges ahead in this highly impactful workshop that not just shares the 'Why' but the 'How' of effective managerial skills as well.

Stand & Deliver – Presentations Skills

To be able to present in front of audiences effectively is a core managerial and leadership skill. Effective presentations display confidence and conviction and an innate ability to influence an audience to your organizations' perspective.

Aligning Mindsets - Cross Culture Sensitization

As the world gets smaller and your work place get culturally more diverse; are you preparing yourself to align mindsets? How do we respect differences and find the balance between being who we are and what we are expected to be without losing out on productivity and a 'happy' work environment? Aligning Mindsets is a workshop that sensitizes you to the 'other' way of doing things without compromising on your sense of self

Unleashing Creativity

Some organizations seem to be in a continuous improvement cycle. What do they do differently? How are they constantly creative and innovative? What is the impact of creativity and innovation? Through this program, employees of an organization are able to refocus their energies on creating better processes, systems and ways of doing 'things' that impact all areas of business in the organization
